Pondok Jati CN-20, Sidoarjo

Results-driven Mobile and Full-Stack Developer with a Bachelor's in Informatics and hands-on experience building scalable applications using Flutter, Node.js, and SQL. Adept at state management, complex database aggregation, and delivering user-centric features. Strong collaborative skills with a proven track record of modernizing legacy systems and optimizing app performance

Work Experiences

Indoserako Sejahtera - Sidoarjo - Jawa Timur, Indonesia

Jul 2022 - Nov 2022

Internship - IT Staff

The company dedicated to industrial automation and information, provides custom assembly automation and has provided highly engineered solutions and systems for many industries.

- **Back-End (Node.js & PostgreSQL):** Developed and deployed highly efficient RESTful APIs using Node.js (Express.js), integrating seamlessly with PostgreSQL databases to manage complex back-end data operations.
- **Front-End (PHP & CodeIgniter):** Built responsive web application interfaces using PHP and CodeIgniter, implementing MVC architectural patterns for scalable and maintainable codebases.
- **Feature Implementation:** Engineered end-to-end core platform functionalities, delivering secure User Authentication/Management, automated Project Approval workflows, and robust error-handling systems.

PT. Indonesia Multi Colour Printing - Indonesia, Jawa Timur, Surabaya

Oct 2023 - May 2026

Staff Management Information System Software

PT IMCP developed into one of the suppliers of cans and closures (lids made of metal) in Indonesia

- **Front-End (Flutter):** Spearheaded the end-to-end development and scaling of cross-platform applications (Android, iOS, Web), transitioning legacy systems into fully responsive solutions for enterprise apps like the Meeting Room Reservation and Material Request systems.
- **Back-End (Laravel):** Engineered core REST API architectures using Laravel to handle complex business logic and seamless data integration for internal company operations.
- **Server Routing & API Gateway (Node.js):** Configured Node.js (Express.js) as a secure API Gateway to manage hosting environments, routing backend traffic to Laravel and opening dedicated secure ports for the Flutter front-end.
- **Infrastructure & Networking:** Introduced local IP network support to minimize internet dependency and downtime, while independently managing CPanel hosting for bandwidth optimization and live troubleshooting.
- **DevOps & Tools:** Established strict Git version control workflows, maintained in-code technical documentation, and integrated OneSignal for reliable multi-platform push notifications.

Education Level

UK Petra  - Surabaya - Jawa Timur, Indonesia

Jul 2019 - Jul 2023

Bachelor of Informatika, 3.55/4.00

- Oracle Cloud Infrastructure Foundations 2021
- AWS Academy Cloud Foundations Course

Organisational Experience

Himpunan Mahasiswa Informatika - Surabaya

Apr 2021 - Jun 2022

Vice Chairman of Internal Development

- Manage event organize major events related to the committee
- Coordinate members (chairman of the event) along with the final report of the event

FAITH 2021 - Surabaya

Mar 2021 - Jul 2021

Member Publication, Design and Documenter (PDD)

FACULTY OF INDUSTRIAL TECHNOLOGY INTERNATIONAL COMPETITION

- Create and design Guidebook for international participants with Canva.
- Create and design Certificate for international participants with Canva.

Project Experience

- **Thesis - Project Management (2023):** Create Mobile Apps with Flutter and the feature like on internship with connect to backend. Thesis improve on feature local database synchronization for progress and notification in local to reminder the deadline task. Improve on State Management, Local Database, SharedPreferences, Compress Image, Clearing cache, Permission all hardware access, Compatibility

android 13, and another else.

- **Class Project - APP Online Shopping** (2021): Create Mobile Apps with Kotlin and the features Login Management, Add cart, Checkout, Payment use Packages called RazorPay, History Page and another else.
- **Class Project - Website Online Attendance** (2021): Create Website with Javascript, PHP and the feature Login Management, Cuti Management, Graph report, Locate location and device name for absent
- **Interest on Mobile Device Development (Flutter)**  (2023): Upgrade Flutter to newest version, learn also how to create UI more better, hardware access like GPS, Camera, Maps (flutter_map), Permission system, compatibility Android 13 and lower version. Now learning MVVM concept in Flutter
- **Interest on AI Assisted Coding (2026)**: Code Optimization & Refactoring: Leveraged AI-assisted coding methodologies to rapidly write, refactor, and debug complex Python scripts, significantly accelerating the development cycle. Database Engineering: Engineered custom SQL aggregate scripts for technical database management, streamlining complex data filtering, extraction, and processing workflows.
